2. Engineering and Configuration Tools

SecuriFire Studio: SecuriFire Studio is the standard PC application complete with all software modules (programs) for project planning, commissioning, maintenance and diagnostics of all control-, indication panels and control maps belonging to the SecuriFire system family and for the detector loop periphery.

Virtual Mic: The virtual control panel SecuriFire VirtualMIC provides a clearly structured, standard-compliant display and control of the fire detection system on a local PC.

Detector Stimulation: Alarm stimulation and system check on detector for testing purpose. SecuriFire unit doesn't see stimulation, Alarm looks like a real alarm (Execution of macros, etc.)

Dongle order form available on the Securiton Homepage:
